Missing parts of message history Exact steps/settings needed to reproduce the problem Temporary solution Use Clear local database under Data and storage options > Memory usage No messages on mobile, but visible in telegram Flag of the Republic of Karakalpakstan Add the official flag of the Republic of Karakalpakstan to emoticons. It is a sovereign republic in Uzbekistan. You can find the official flag here Add the built-in proxy VMess, Shadowsocks, SSR, Trojan-GFW The (vmess/vmess1/ss/ssr /trojan) proxy - the link in the message is active. Improved ability to search chat history in Asian regional languages such as Chinese and Japanese. Improved ability to search chat history in Asian regional languages such as Chinese and Japanese. Telegram's chat history search feature is word-based and suitable for languages like... Ability to reply to messages with small emoticonsinstead of replying with chat messages or stickers. Use cases 1. Quick feedback that doesn't take up space in your message history... Ability to join Telegram incognito by setting phone number privacy to "None" before creating a new account. Existing users who have added this number to their contact list will not receive a new number c... The message time is superimposed on the sticker text. The time of the message is displayed on the sticker. The label is not easy to read. It is common for time to obscure part of the text on the sticker. And if the sticker is sent from the channel - group video calls will be introduced in June 2021. Related offers: group video calls with contacts, screen sharing in private chats. Cryptocurrency donations to bots, groups and channels Show button to quickly send cryptocurrency donations to bots, groups or channels. Can use established cryptocurrency such as Bitcoin, Ethereum, EOS, etc. - or any - screen sharing from mobile and desktop apps, in one-on-one calls and voice chats (including group calls as they become available). Choose a default folder other than All Chats. Ability to pin one of the folders as the root folder instead of "All Chats". When you open the app, the selected folder will appear. Pressing the back button will take you back to where you are with an emergency code to hide the chat. Ability to set an alternate access code ("double bottom") that opens a limited set of chats, opens a different account, or completely destroys one of the linked accounts upon entry. Use Cases... Chat Permissions: Can Talk Please Add Chat Permissions: Can Talk. How it works If this option is enabled, the user can talk in voice chat. Otherwise, the user will be blocked. For users in the application, it would be beneficial for chat owners - they will be able to: In December 2021, an added translator was introduced in the application. Available in mobile apps in Settings > Language. TranslationNews via context menu, e.g. Twitter for tweets. Thanks... Unlimited favorite stickers Increase the limit of favorite stickers. The current limit is five stickers. If you add another one, the first sticker will be replaced. Use cases Select a limited number of stickers that you will always use... Ability to notify all group members or administrators with a special mention (e.g. @all and @admins). Use Cases Breaking news and important updates in key communities. Potential Issues Some group admins already... Live video sharing feature between groups and channels in Telegram. Broadcast from a channel or personal account (in group chats) for others to see, reply and interact with. Alternate profile pictures If you set a profile picture or video that only your contacts (or specific users, groups, etc.) can see, you can choose an alternate picture or video that everyone else can see. Use Cases - Allow site owners to create their own Instant View templates Instant View templates are currently created and managed by Telegram, the list of supported sites will be gradually expanded. Some site owners would like to get IV support for their sites earlier. Add Instant View to Telegram Dashboard Add Instant View to Telegram Dashboard. This feature is already included in the Telegram app for macOS, but not on the regular Telegram desktop. It is desirable that the article opens in an existing Telegram window ... Reply only to part of the message. This would be very helpful if someone wrote a very long post and you only want to link to a sentence or two, or even just one or a few words, photos or short videos, texts, etc.) with your general contacts (this can be configured with specific privacy permissions) to view, interact and share. Statuses like this... Disable new contact Attached chats Users will be notified when one of their contacts becomes available on Telegram. currentlydisable notifications: New chats will appear in the list without sending notifications à Option to allow the channel/group owner to better communicate with subscribers without the risk of trolls reporting them as spammers. Option for a channel or group owner to set a visible flag informing all new members that the channel owner/groups/admins can contact them privately once... Make global search the place to find all communities across channels and public chats. Add option to choose icons for folders on mobile platforms like Telegram Desktop and Telegram macOS. Sync them across all your devices. Use Cases - Find the folders you're looking for more easily. - Keep... Transfer ownership if the creator account is deleted. Ability to transfer ownership of groups and channels if the creator is removed, so the first admin with all permissions becomes the creator! To make it happen ð Applications: All Transfer calls between devices The ability to seamlessly transfer ongoing voice and video calls between different devices using a single account: for example, from a mobile phone to a desktop computer and vice versa. Multiple two-factor authentication methods Option to add an authentication app with temporary one-time passwords (eg Authy, Google Authenticator) as an additional factor. Add option to disable automatic ordering of sticker packs on mobile. Add option to disable automatic sorting of sticker packs. If there are many packages, it is worth ordering them so that it is easy to find the right sticker. This did... Different wallpapers for each chat A feature that allows you to set a separate background for a specific chat. (eg one wallpaper for a specific group, another for a chat with a friend...) Examples of use It will make navigation between chats easier, especially... Blocking individual passwords for specific chats or the ability to archive the blocking of some chats with an individual password. Chat after chat or beyondEntire chat folder, e.g. archive. Use the iPad Case Family and other shared devices. It can also be used in environments. Requests to join a group or channel If enabled, a user trying to join a group/channel can only view content and send items after the admin has approved it (optional: only admins with "Accept/ Reject" Telegram message limit. Old messages will disappear forever When the number of messages reaches one million, old messages will disappear Steps to create new 1. Be an active Telegram user 2. Wait for the desired number of incoming/outgoing messages reached 3. Oh, that's... Hiding messages from blocked users in groups Sometimes you don't want to see messages from people you've blocked, even in groups you share with them, such messages might be automatically collapsed and hidden under a spoiler (e.g. "You blocked Doge". Telegram fetches images Anst at t to use clipboard bitmap data When I paste an image copied from Firefox, Telegram downloads it again instead of using the bitmap data from sch sheep. That's because the clipboard also stores the URL of the image. If I put Tmail - Telegram's email service Telegram is a great messenger, but it can also be a great email service. So, without further ado, let's get started. The Mail app can be separate or simply integrated with Telegram Messenger. Added Clear Answer/Invalid Answer button in polls (quiz mode) also for channel admins and channel subscribers. Hello sir/mother. I am. I would like to bring an important suggestion/request to Telegram's attention. I run Telegram channels consisting of over 50,000 very active students taking quizzes. syntax highlighting in code blocks An additional syntax extension that specifies the language to be highlighted. Similar examples are Gitlab and GitHub comments. Remove or change the features of Telegram ads. I really wish Telegram would do thatplacing sponsored ads on channels. I've always considered this my safe zone while the rest of the internet is drenched in ads. If ads go to: [Privacy] [Private] New privacy option to prevent private messages from non-contacts. So many have been asking (for various reasons) for years (even before we had this suggestion platform) and as you can see with other suggestions on this platform No The a popup is displayed when reached Floodwait Lme link limit When the Floodwait Lme link limit is reached, an endless loading animation will appear, which may confuse users into thinking there is a connection problem. No problem on iOS where the popup is displayed correctly. Remaining files in Telegram Option to rename a file in Telegram without re-uploading the file. Applications: All Allow bots (web applications) to be added to the attachment menu for all bots Now only selected bots can be added to the attachment menu. But as a developer of embedded bots, I see this as a hindrance to making Telegram a better messaging tool. Let users decide what they want to see in their post. Message bookmark/star option. Starring a message will add it to a separate Starred Messages section on your profile page, giving you quick access to your messages. Even if there are no starred messages in Telegram - Show folders when messaging. Ability to view folders when sharing or forwarding messages. Use Case Find the chats you're looking for faster. Solution - Use the search option to find the chat if it's not at the top. - Upstairs.
